## About The Project

This is a web application for demonstrating the use of local storage in DOM manipulation. I have implemented the following features:

- Local storage
  - Local storage creation
  - Local storage update
  - Local storage deletion
  - Local storage retrieval
  - Local storage clear
- Preference storage
  - Preference storage creation
  - Preference storage update
  - Preference storage deletion
  - Preference storage retrieval
  - Preference storage clear
- Visit counter

## Built With

This project was built with the following technologies

- [HTML \(https://www.w3schools.com/html/\)](https://www.w3schools.com/html/)
- [CSS \(https://www.w3schools.com/css/\)](https://www.w3schools.com/css/)
- [JavaScript \(https://www.w3schools.com/js/\)](https://www.w3schools.com/js/)

- [FontAwesome \(https://fontawesome.com/\)](https://fontawesome.com/)
- [Google Fonts \(https://fonts.google.com/\)](https://fonts.google.com/)

## Getting Started

To get a local copy up and running follow these simple steps.

### Prerequisites

You need to have a browser installed on your machine. I recommend using [Google Chrome \(https://www.google.com/chrome/\)](https://www.google.com/chrome/)

### Installation

1. Clone the repo

```
git clone https://github.com/Techsupport254/Intern.git
```

2. Open the index.html file in your browser

```
index.html
```

3. You can now use the application

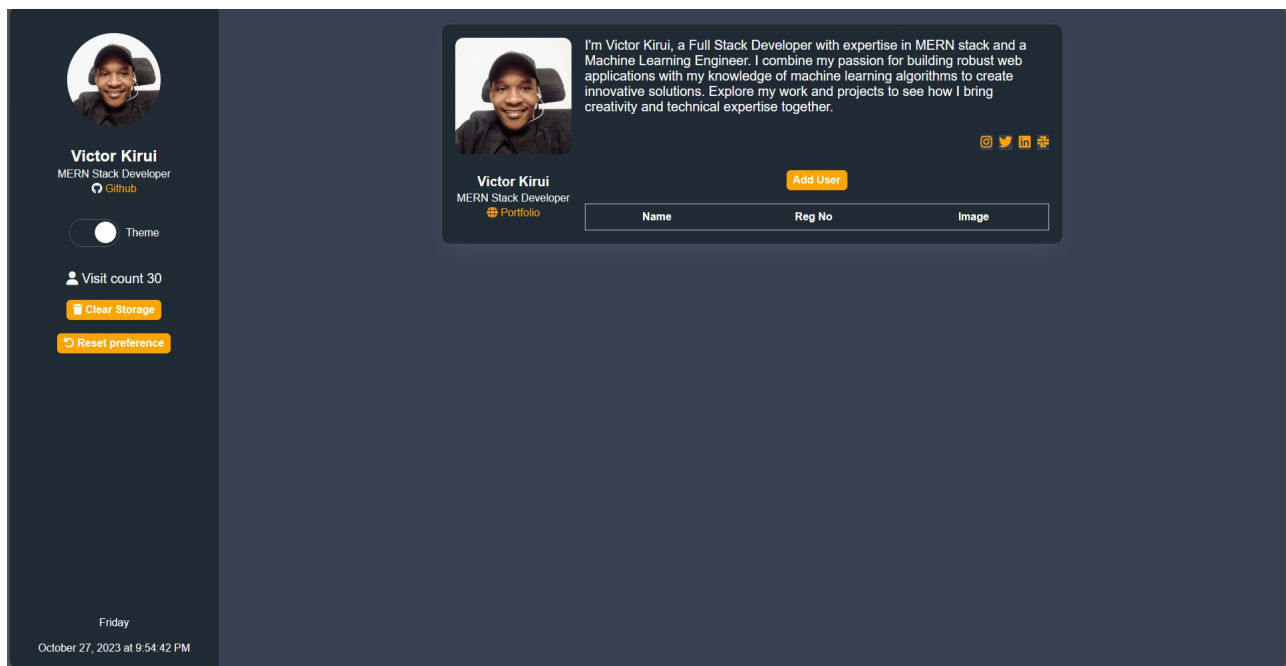

## SCREENSHOTS

i.) Home page

- Light mode
